MG2.1 HYDRAULIC PRESSURE MANUAL MOBILE BLOCK MACHINE

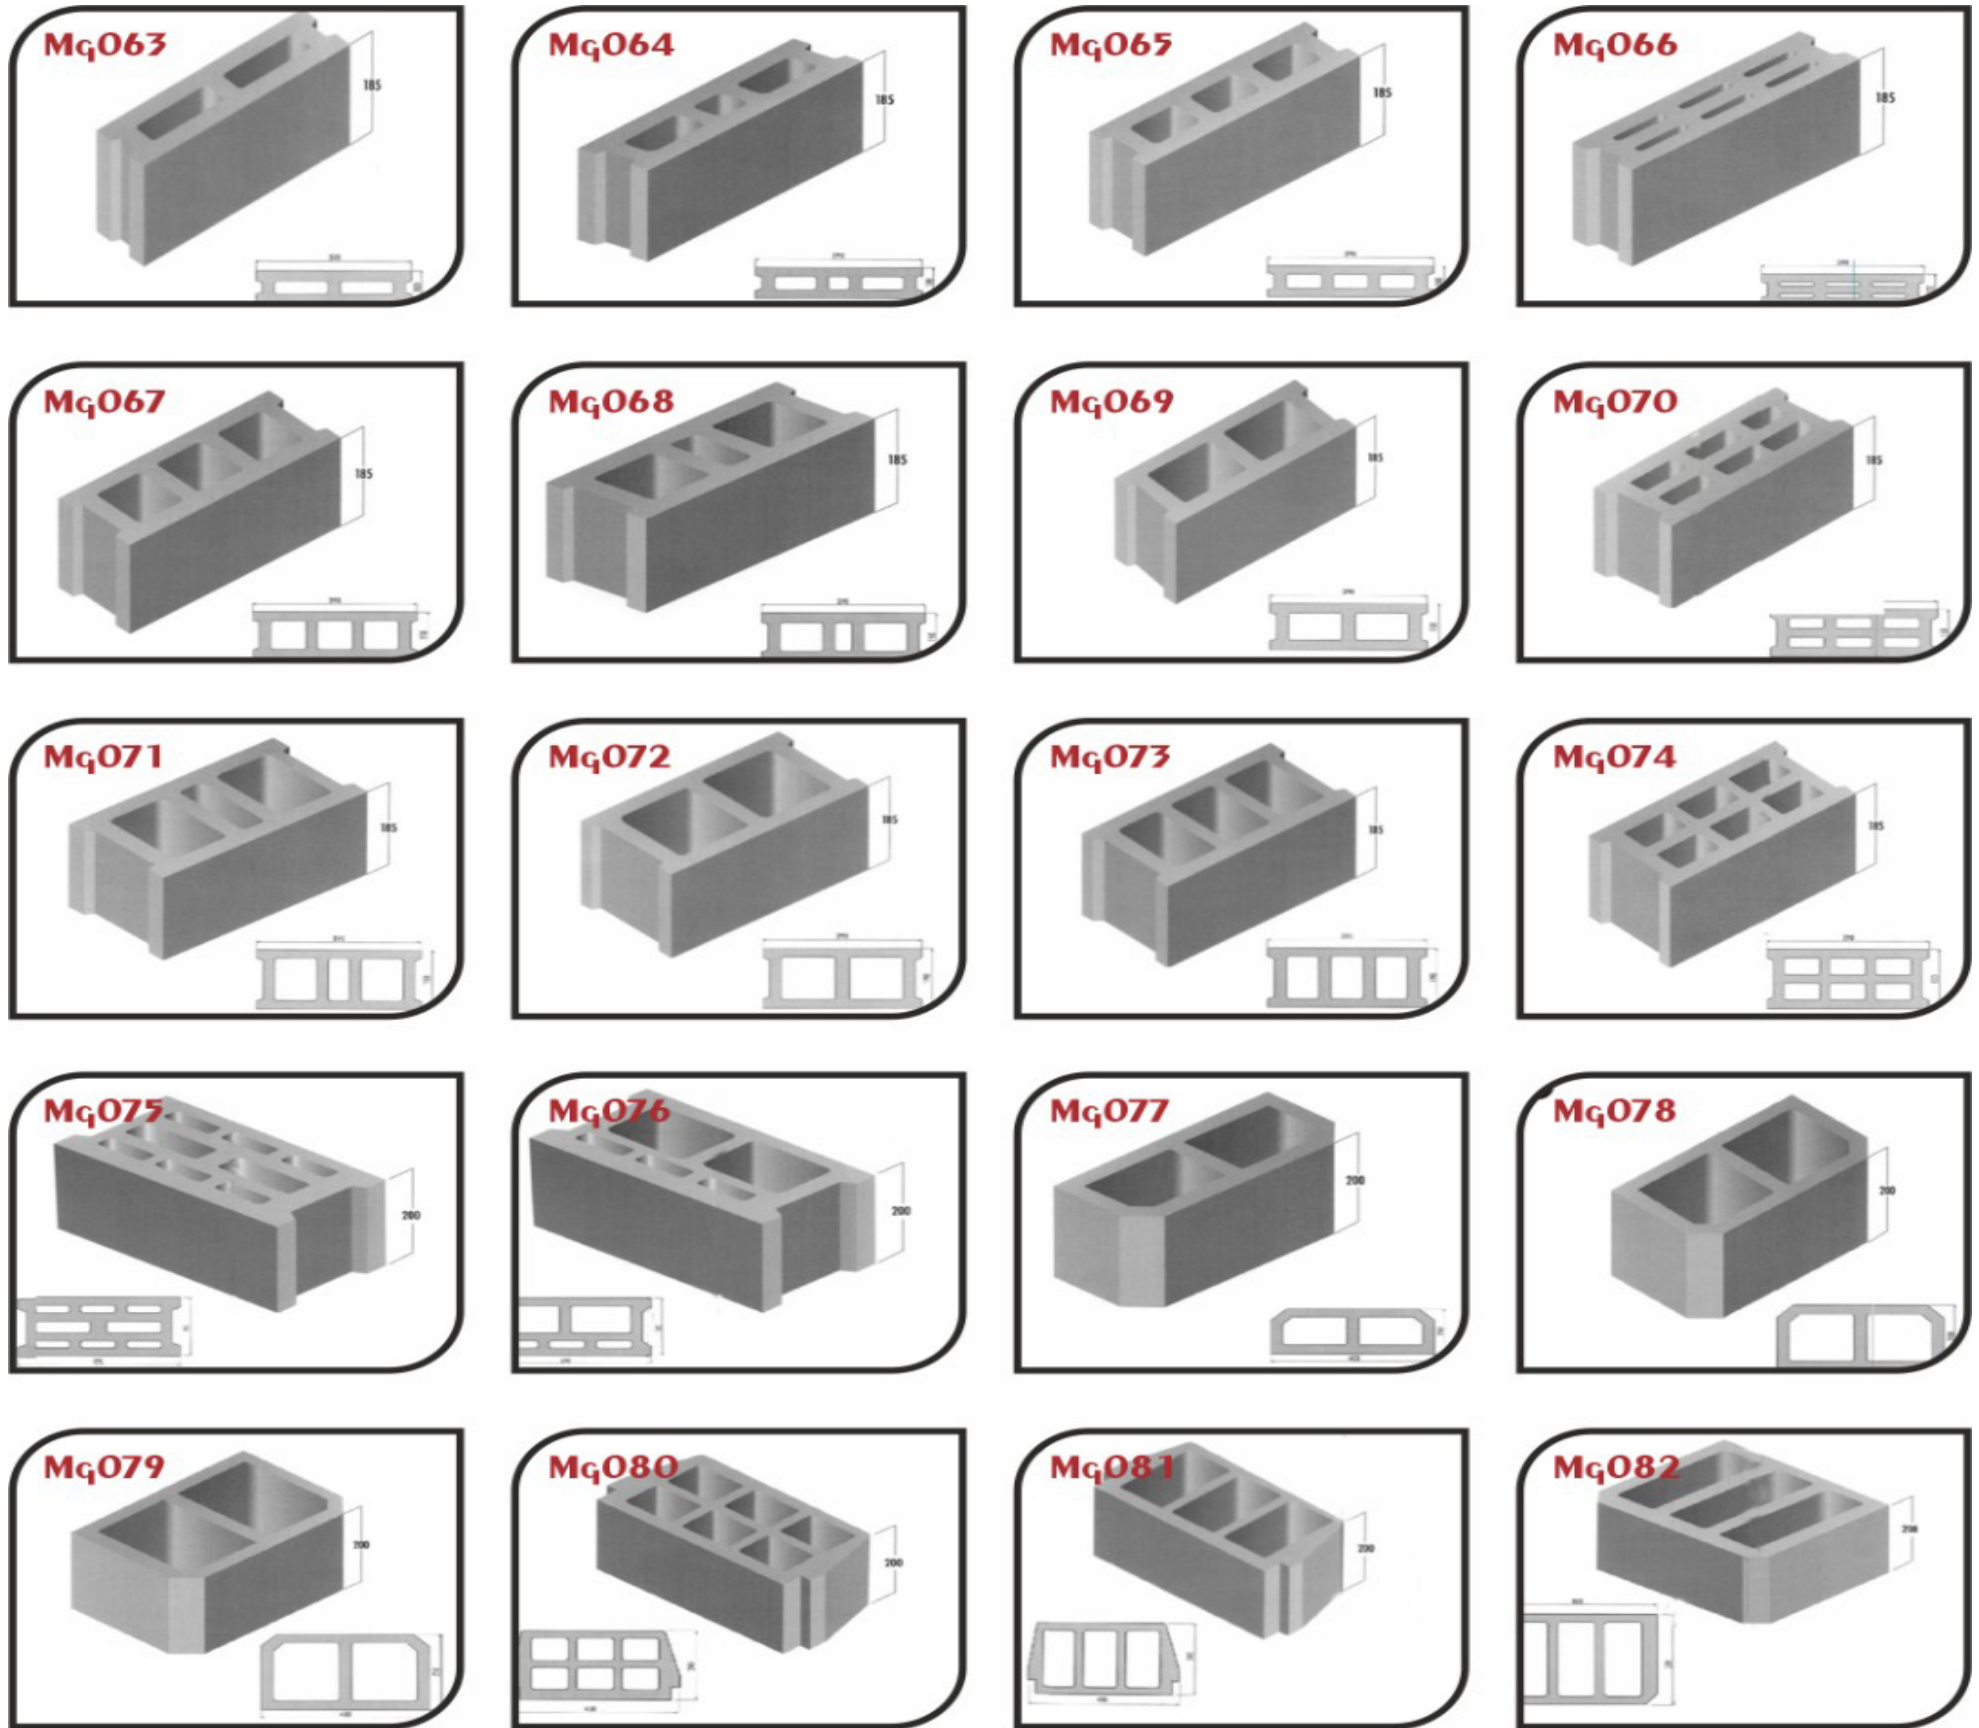

Hydraulic Pressure Manual Mobile Block Machine: It is a machine with hydraulic and mobile operating system. You can easily produce all kinds of single layer blocks, pumice, and plug-in pumice by changing the mold easily. It is designed on a 24-hour working basis. The raw materials required for the stone to be produced are water, cement, sand, pumice, crushed stone, stone dust, etc. These raw materials can be added or removed according to the desired product.

Shipment - Installation – Staff and Training:The machine with 1 moulds and mortar spreading shovel, total production time of the machine is an average of 15 days and the shipment volume is 1 CBM container. Shipping rates vary by country, but range from \$ 250 to \$ 500 on average. MG2.1 is a practical machine that does not require installation. The number of staff required for production consists of at least 1 and at most 2 people. Our company provides the staff with all the necessary information during the production phase free of charge. For more detailed information, you can visit our website [here](#) or contact our customer representative at +90 544 747 74 63.
