Why Should You Choose Us?

MUSSAN GROUP started its activities in Trabzon with a 1200 m2 manufacturing factory and 3-storey Head Office under the brand of Mussan Machine with Block / Paving Stone Machine and Molds, and continues its production with Injection Machines and Molds, Concrete Plant, Mortar Mixing Machines and Equipment, Concrete Pipe Machines and auxiliary equipment. In addition, our company has reached a certain market share in the foreign market with our promotional activities and has become a company that exports to 21 different countries. Currently, with more than 20 personnel, it continues to develop its business volume by making various investments in the Construction Machinery, Real Estate and Furniture sectors.

What is our goal in production as Mussan Group Machine?

With its dynamic, experienced, customer satisfaction oriented and expert staff, we bring technology together with the machinery sector and customer satisfaction is unchanging with its strong body structure, trouble-free and rapid operation, the latest technological equipment, skilled and experienced workmanship, long-lasting and technical service support in all the facilities and machines we sell. We design the higher quality of the machines in the market to be affordable and long-lasting.

What are the Sales We Have Made?

Although Mussan Group Machinery is a recently established company, it continues to work with fast steps. Our company, which has managed to operate in the international arena in a short time, has made sales to 17 countries with the different machine and mold models it has produced. As of 01.12.2021, the countries we sell to and the machinery and equipment are as follows;

Turkey (Tekirdağ 1 MG2.1 block machine, Giresun MG2.1 block machine, Diyarbakır 1 MG2.1 block machine, Trabzon 1 MG4.1 block machine, Ankara MG2.1 Mobile block machine, Istanbul 1 MG2.1 Mobile block machine)

Armenia (1 YBM4 Mobile Block machine)

Georgia (2 pieces of MG 3.1 Block Machine, 2 pieces of MG 4.1 Block Machine, 1 piece of MG 8.1 Block Machine, 3 pieces of second hand MG 4.1 Block Machine, 2 pieces of second hand MG 8.1 Block Machine)

Iraq (1 piece of 12cm block mold)

Somalia (1 piece of MG 4.1 Block Machine, 1 piece of MG 6.1 Block Machine, 1 piece of MG2.1 Mobile block machine)

Ivory Coast (1 piece of MG 4.1 Block Machine, 1 piece of MG 2.1 Block Machine)

Comoros (1 piece of MG 2.1 Block Machine, 1 piece of MG2.1 Mobile block machine)

Mali (1 piece of MG 6.1 Block Machine)

Ghana (2 pieces of MG 4.1 Block Machine, 1 piece of second hand MG 4.1 Block Machine) Senegal (1 piece of second hand MG 4.1 Block Machine)

Liberia (1 piece of MG 2.1 Block Machine)

Nigeria (1 piece of MG 2.1 Mobile Block Machine)

Guinea (1 piece of YBM4 Mobile Block machine)

Burkina Faso (1 piece of MG 4.1 Block Machine)

Democratic Congo (1 piece of MG 4.1 Block Machine)

Post-sales production phase

After the sale is approved, our sales representative forwards the necessary information to the production department about the machines, equipment and molds sold. Our engineer in the production department makes the technical drawing of the products to be produced and sends them to the factory manager. Our factory manager starts the production process by ordering the technically drawn materials. The ordered materials are processed in our machine park such as milling, lathe and welding machine in our factory, and the desired machinery, equipment and molds are delivered to the customer within the production period given to the customer.

What are our short-term future goals?

As Mussan Machine, our primary goal is to continue production by constructing a closed production area of 2,000 m2 in the Organized Industrial Zone in order to better meet the increasing production demands. In addition, increasing the number of marketing, technical team and production personnel working in our organization, reaching more potential customers and increasing the number of countries we sell to. In addition, we want to contribute more to the construction industry by increasing our concrete plant and crusher machine sales and improving our product range.

As Mussan Group, we want to repeat the success we have achieved as Mussan Machine in different sectors by investing more in the real estate and furniture sectors.

Who's on Our Team?

Our Manufacturing Team

Since its establishment, Mussan Machine has been producing machines in line with the developing technology and world-class Concrete Paver Machines - Block Machines, with the efforts of its engineers and qualified personnel, and by offering customizable solutions according to the needs of its high-quality customers.

We are proud to provide you with the highest quality services thanks to the superior effort and years of experience of our production team.

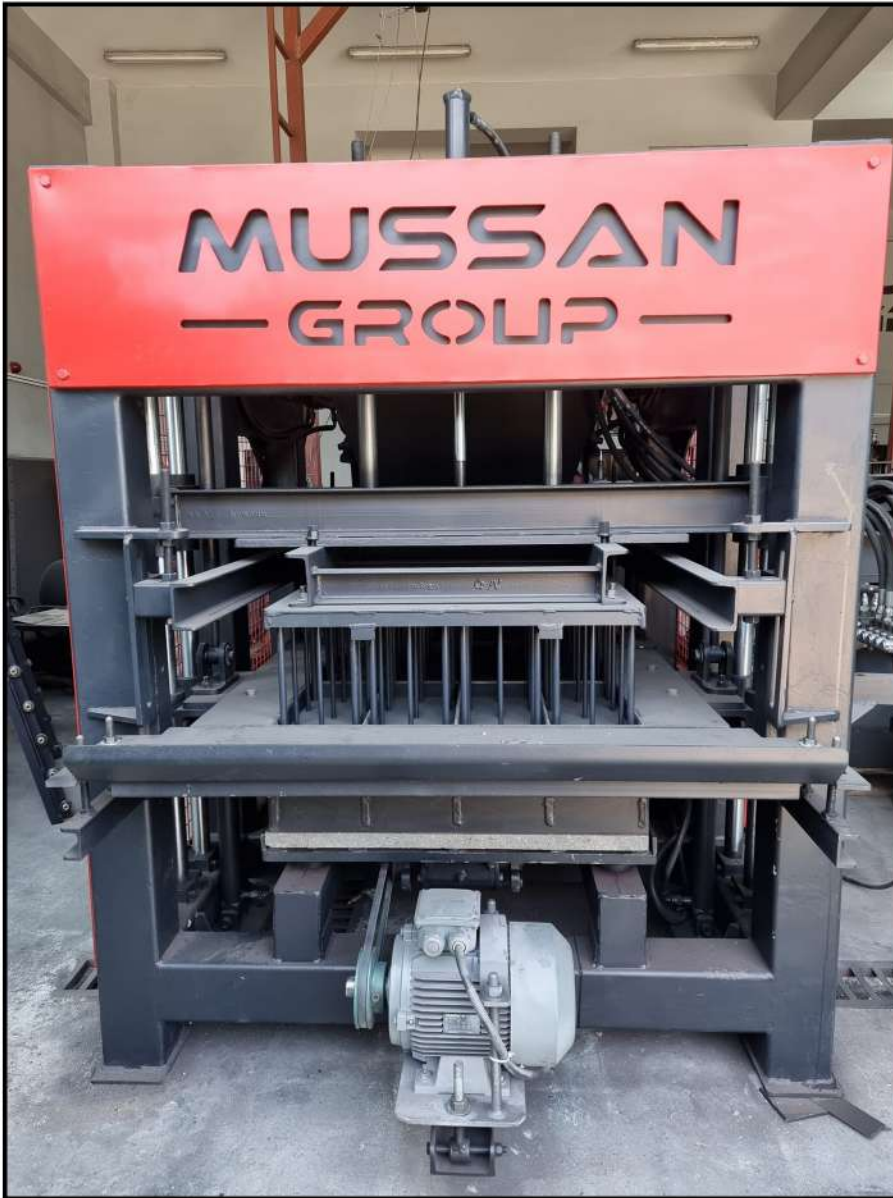

Our Factory

Today, Mussan Machin continues to produce Block Machines and Paver Machines in its factory with an area of 1000 m2 and a large production team of 10 people. Value Judgments Based on Customer Satisfaction, Product Presentation in accordance with Innovative Technology, Special Production and Different Machine Types Suitable for Sector Needs and Professional Product Presentations in the Field.

Our Prices for Every Budget

We determine the price of the machines according to every economy budgets and we offer a quality machine to our customers, the reason why our prices seem low when we compare our prices with competitor companies in Turkey, China and Europe the reason is not a low quality machines, but the aim is to increase our machine quality and actually make sales by taking the budgets of our customers into account .

The Most Important Point to consider in the quotation of Other Companies Is The Production Capacity Of The Machine In 8 Hours. Some Companies May Say Their Daily Production Capacity On The Basis Of 24 Hours And Actually Say More Production Capacity. Due to this reason, when you get offers from different companies, you need to check how many blocks and which size block can be produced in how many hours. Another important criterion is the number of equipment that comes with the machine in the offer and the price comparison should be made accordingly.

Raw Materials Used

With the aim of providing the highest quality product to our customers, in the production of our machines, St 52 is produced from high strength, 4 mm or 6 mm thick (Optional) Steel Profile. With its strong body structure, it is heavier, long-lasting and durable. All Wheels on the Machine are Produced as Ck-45 and 4140 with High Carbon Ratio. High Cycle And Heat Resistant Bearings Are Used In Vibrators. Hydraulic Pistons Used in Our Machine Are Processed In Cnc Laser (Computer Numerical Control) Machines. In this way, it is suitable for heavy duty, long-lasting and durable. Column shafts are bearing with 4 chrome shafts of 40 mm diameter. Engines Used in Machinery and Other Equipment Iso, Ce, Eac, Tse Quality Made in Turkey (Gamak Motor) Dur. Mussan Machine, which is not limited to Turkey in the time passed, sells to different countries in Africa.

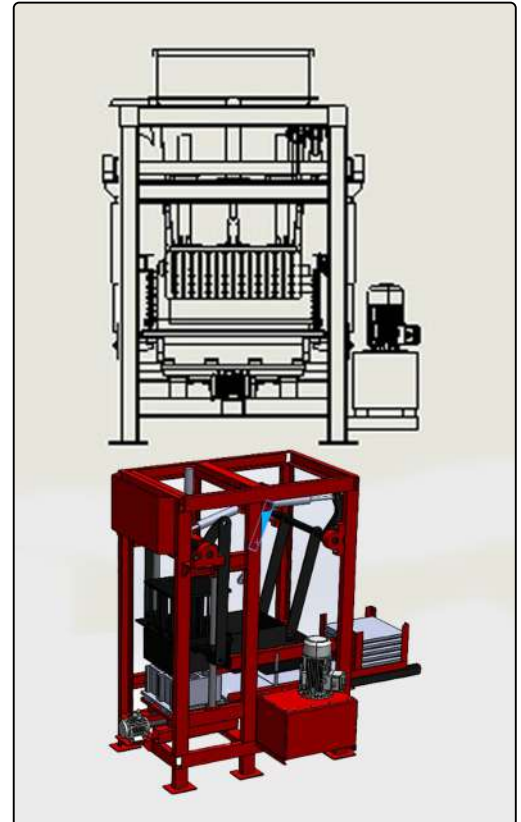

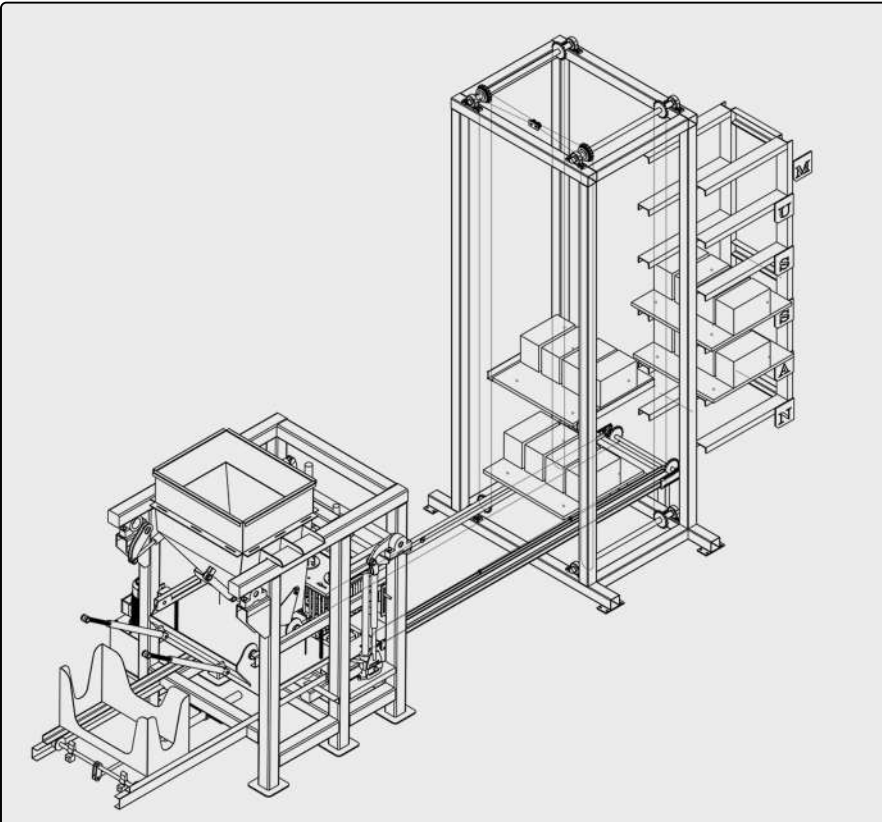

Installation Support After Sales

The ordered materials are processed in our machine park such as milling, lathe, welding machine in our factory and the desired machinery, equipment and molds are delivered to the customer within the production period given to the customer. After the Machine reaches the customer, Video Technical Support is provided in a foreign language requested by our company. In addition, in cases where the Video Technical Support is insufficient, Field Maintenance and Repair Support is Provided.

Engineering and R&D works

Customer Oriented Service Approach Reflects The feedbacks From Our Sales. Through an R&D Team Combining Innovative Designs with the Latest Technologies, It Produces Manufacturing Facilities Based on High Quality, Long-Term Projects and Offering Customizable Solutions According to the Needs of its Clients..
